Vacuum therapy for erectile dysfunction

أنظمة العلاج بالتفريغ الهوائي لضعف الانتصاب

A drug-free, non-invasive vacuum erection system with everything in one kit. Supplied in the UAE by Metlife Medical Equipment Trading.

Approved by MOH · Reg. No. 9143-10738-1

Drug-free	Non-invasive	MOH approved	1-year
No tablets or injections	No surgery needed	Reg. No. 9143-10738-1	Manufacturer warranty

WHY VACUUM THERAPY

A proven option when tablets are not enough

No medication
Suitable for men who cannot take ED tablets, including those on nitrate therapy.

Recognised in ED guidelines
Vacuum erection devices are a standard non-surgical treatment option in urology.

Penile rehabilitation
Used in rehabilitation programmes after prostate surgery and pelvic treatment.

Works on demand
An erection in a few minutes, when the patient needs it, with no waiting for a drug to act.

HOW IT WORKS

Three simple steps

1. **Create the vacuum**
The cylinder is placed over the penis and the pump gently removes air, drawing blood into the penis.

2. **Place the tension ring**
Once an erection is achieved, a tension ring slides from the cylinder to the base of the penis to keep blood in place.

3. **Remove the cylinder**
The cylinder is removed and the erection is maintained. The ring is taken off within 30 minutes.

For healthcare professionals. Registered by MOH as a Class I medical device, dispensed through pharmacies only. Patients should be assessed and trained by their physician before use.

THE SYSTEM WE SUPPLY

Pos-T-Vac Battery System

نظام Pos-T-Vac بالبطارية

BATTERY-OPERATED ✓ APPROVED BY MOH

Battery-Operated Vacuum Therapy System

Model BOS-2000-2 · Pos-T-Vac Medical, USA

Push-button automatic pumping creates an easy, consistent vacuum with no hand pumping. A complete kit for patients starting vacuum therapy.

PUMP	Push-button automatic
